## Analysis of Table 1.2

In the June quarter 1995 the total increase in population was 7,500. The total increase for the 1994-95 year of 30,700 is higher than for any financial year since 1989-90. Between March and June 1995 quarters, all three components of population change decreased.

There was no change in the natural increase between 1993 and 1994.

However, net estimated overseas migration jumped from 5,500 in 1993 to 8,100 in 1994, and net estimated interstate migration increased from 600 to 4,500 persons.

### Analysis of Table 6.2

The decrease in the overall production in meat is a direct reflection of the drop in animal slaughterings for January 1996. Lamb production showed an increase despite the decrease in numbers slaughtered due to a shift in carcass weight distribution.
